

Psych269 Cognitive Robotics – Laboratory 5

Basic NXT Outputs using NXC

Work through the examples in chapter 10 of Hansen's "NXT Power Programming". Start with the basic platform. The lawnmower attachment shown on pages 229-235 is optional. Code and test all of the examples given on pages 236-241. Code the example on pages 250-251. If there is time remaining try some of the drawing examples from pages 242-250.
