

LSci 51/Psych 56L:
Acquisition of Language

Lecture 17
Development of syntax I

Announcements

HW 5 is due 12/2/20 - be working on it

Be working on the review questions for morphology and syntax

Consider taking language science courses next quarter (LSci)!

Adult knowledge: The target state for syntax

Adult knowledge: The target state for syntax

Creativity of human language

Ability to combine signs with simple meanings to create

- (1) Utterances with complex meanings
- (2) Novel expressions
- (3) *Infinitely* many

Sentences of prodigious length...

“Sir Didymus said that he thought that the odiferous leader of the goblins had it in mind to tell the unfortunate princess that the cries that she made during her kidnapping from the nearby kingdom that the goblins themselves thought was a general waste of countryside ...”

Creativity of human language

Ability to combine signs with simple meanings to create

- (1) Utterances with complex meanings
- (2) Novel expressions
- (3) *Infinitely* many

https://www.ted.com/talks/ajit_narayanan_a_word_game_to_communicate_in_any_language

“So there is another hidden abstraction here which children with autism find a lot of difficulty coping with, and that's the fact that **you can modify words and you can arrange them to have different meanings, to convey different ideas**. Now, this is what we call grammar. And grammar is incredibly powerful, because grammar is this one component of language which **takes this finite vocabulary that all of us have and allows us to convey an infinite amount of information, an infinite amount of ideas**. It's the way in which you can put things together in order to convey anything you want to.”

An account that won't work

“You just string words together in an order that makes sense”

In other words...

“***Syntax*** is determined by ***Meaning***”

(The way words are put together is determined solely by what they mean)

Syntax is more than meaning

Nonsense sentences with clear syntax

Colorless green ideas sleep furiously. (Chomsky)

A verb crumpled the ocean.

I gave the question a goblin-shimmying egg.

...which are incomprehensible when the syntax is nonsense

*Furiously sleep ideas green colorless.

*Ocean the crumpled verb a.

*The question I an egg goblin-shimmying gave.

Syntax is more than meaning

More nonsense sentences with clear syntax

From “Automated Alice” by Jeff Noon:

Oh spoons may dangle from a cow
With laughter ten feet tall;
But all I want to know is how
It makes no sense at all.
Oh shirts may sing
to books who pout
In rather rigid lines;
But all I want to turn about
Is how the world unwinds.

Syntax is more than meaning

Famous nonsense sentences with clear syntax

'Twas brillig and the slithy toves
Did gyre and gimble in the wabe;
All mimsy were the borogroves,
And the mome raths outgrabe

Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!"

- Lewis Carroll, *Jabberwocky*

Syntax is more than meaning

'It seems very pretty,' she said when she had finished it, 'but it's RATHER hard to understand!' (You see she didn't like to confess, even to herself, that she couldn't make it out at all.) 'Somehow it seems to fill my head with ideas -- only I don't exactly know what they are! However, **SOMEBODY** killed **SOMETHING**: that's clear, at any rate -- '

Syntax is more than meaning

And these same nonsense sentences with nonsense syntax are incomprehensible...

'Toves slithy the and brillig 'twas
wabe the in gimble and gyre did...

Syntax is more than meaning

Ungrammatical sentences that make perfect sense

Jareth put the cape on.

Jareth put on the cape.

Jareth put it on.

*Jareth put on it.

Syntax is more than meaning

Ungrammatical sentences that make perfect sense

Sarah gave a ring to the Wiseman.

Sarah gave him a ring.

Sarah donated a ring to the Wiseman.

*Sarah donated him a ring.

Syntax is more than meaning

Ungrammatical sentences that make perfect sense

Jareth made Hoggle leave.

Jareth let Hoggle leave.

Jareth saw Hoggle leave.

*Jareth wanted Hoggle leave.

*Jareth made Hoggle to leave.

*Jareth let Hoggle to leave.

*Jareth saw Hoggle to leave.

Jareth wanted Hoggle to leave.

Syntax is more than meaning

Ungrammatical sentences that make perfect sense

Hoggle poked at the wall.

Hoggle hit at the wall.

*Hoggle touched at the wall.

*Hoggle poked the stick against the wall.

Hoggle hit the stick against the wall.

*Hoggle touched the stick against the wall.

Syntax is more than meaning

Cross-linguistic variation

If syntax was entirely determined by meaning, then we should not expect to find syntactic differences between languages of the world....but we do see variation.

English: Sarah sees that book.

Korean: Sarah ku chayk poata.
 Sarah that book see

Syntax is more than meaning

Cross-linguistic variation

If syntax was entirely determined by meaning, then we should not expect to find syntactic differences between languages of the world....but we do see variation.

English:

Baso put the money in the cupboard.

Selayarese (spoken in Indonesia):

Lataroi	doe	injo	ri lamari	injo	i Baso.
put	money	the	in cupboard	the	Baso

So...what does determine how you string words together?

Answer: Syntax!

(That is, our knowledge of the possible *forms* of sentences in our language.)

“Syntax is determined by Meaning”

(The way words are put together is determined solely by what they mean)

A template

A sentence often consists of a **Noun Phrase** followed by a **Verb Phrase**

$S \rightarrow NP VP$

10 Verbs

122,100 Sentences

Embedded sentences

Additional VP Rule

Hoggle thought Sarah ate the peach.

VP → V S ←

Can be used to create a sentence-inside-a-sentence = example of *recursion*

Recursion = a phrase of one kind inside a phrase of the same kind (a sentence is a kind of phrase, so a sentence-inside-a-sentence fits this definition)

Recursion: the LingSpace

<http://www.thelingspace.com/episode-86>,

<https://www.youtube.com/watch?v=q9g77Wj5wr0>

1:34-2:30 = recursion

Recursion: the LingSpace

<http://www.thelingspace.com/episode-86>,

<https://www.youtube.com/watch?v=q9g77Wj5wr0>

5:07-5:31 = long recursive example

Recursion

Additional VP Rule

Hoggle **thought** Sarah ate the peach.

VP → V S

**Infinitely many sentences
can be generated!**

Ludo **said** Hoggle **thought** Sarah ate the peach.

The fairy **claimed** Ludo **said** Hoggle **thought** Sarah ate the peach.

The Wiseman's birdhat **hoped** the fairy **claimed** Ludo **said** Hoggle **thought** Sarah ate the peach.

Recursion

We can also see this property in English noun phrases

NP → NP's Noun

Sarah's friend is a dwarf.

Sarah's friend's uncle is a dwarf.

Sarah's friend's uncle's neighbor is a dwarf.

Recursion

<http://xkcd.com/1557/>

I MET A TRAVELER FROM AN ANTIQUE LAND
WHO SAID: "I MET A TRAVELER FROM AN AN-
TIQUE LAND, WHO SAID: "I MET A TRAVELER FROM
AN ANTIQUE LAND, WHO SAID: "I MET...

Recursion

<http://xkcd.com/1739/>

Recursion

<http://phdcomics.com/comics/archive.php?comid=1758>

WWW.PHDCOMICS.COM

"What if I know what I don't know, but I don't know how to know what I need to know to know what I don't know?"

Recursion

<http://hyperboleandahalf.blogspot.com/2010/02/please-stop.html>

Me: "It's a free country! I can sit on your bed if I want!"

My sister: "PLEASE STOP!"

Me: "PLEASE STOP SAYING PLEASE STOP!"

My sister: "PLEASE STOP TELLING ME TO PLEASE STOP SAYING PLEASE STOP!"

Me: "PLEASE STOP TELLING ME TO PLEASE STOP TELLING YOU TO PLEASE STOP SAYING PLEASE STOP!"

We had discovered a glitch in the system -- Please Stop was flawed. It could be used against itself *infinitely*, thereby becoming useless.

Complementizers: the LingSpace

<http://www.thelingspace.com/episode-86>,

<https://www.youtube.com/watch?v=q9g77Wj5wr0>

2:31 - 4:30 = complementizers

*Note: In structure examples,
DP = NP*

TP = S

CP = S'

for our purposes

Clauses as subjects or objects: the LingSpace

<http://www.thelingspace.com/episode-86>,

<https://www.youtube.com/watch?v=q9g77Wj5wr0>

4:56 - 5:07 = clauses as subjects or objects

Complementizer

Complementizer (Comp): words like THAT, IF, and WHETHER that allow one sentence to be the subject or object of another sentence

Hoggle realized that Sarah ate the peach.

Whether Sarah ate the peach didn't matter.

$S' \rightarrow \text{Comp } S$

$VP \rightarrow V S'$

$S \rightarrow S' VP$

Complementizer

Complementizer (Comp): words like THAT, IF, and WHETHER that allow one sentence to be the subject or object of another sentence

Hoggle realized that Sarah ate the peach.

Whether Sarah ate the peach didn't matter.

$S' \rightarrow \text{Comp } S$

$VP \rightarrow V S'$

$S \rightarrow S' VP$

Example of Recursion 1:

S expands to include S'

S' expands to include S

$S \rightarrow S' VP \rightarrow \text{Comp } S VP$

Complementizer

Complementizer (Comp): words like THAT, IF, and WHETHER that allow one sentence to be the subject or object of another sentence

Hoggle realized that Sarah ate the peach.

Whether Sarah ate the peach didn't matter.

$S' \rightarrow \text{Comp } S$

$VP \rightarrow V S'$

$S \rightarrow S' VP$

Example of Recursion 2:

S expands to include VP

VP expands to include S'

S' expands to include S

$S \rightarrow S' VP \rightarrow S' V S' \rightarrow S' V \text{Comp } S$

S' --> Comp S

Syntax recap

The structure of language (syntax) involves more than simply the meaning of the words. It involves rules about how the words themselves are allowed to go together.

It isn't enough to know the list of possible sentences in the language. Because adults can generate novel sentences and sentences of infinite length, adults need to know a rule system that can generate sentences.

Adults know (unconsciously) a system of rules for generating the word orders they use. A fairly small set of rules can generate a fairly large set of sentences.

Questions?

You should be able to do up through question 6 on the review questions, and up through question 8 on HW5.
