

LSci 51/Psych 56L:
Acquisition of Language

Review Session 1

for

Timed Assessment 1

(Introduction to Language Acquisition)

Logistics

- 9 questions, 4 points each
- +4 point “boost”, so you already get 1 freebie (possible to get more than 100% on the assessment if you get all 9 questions right)
- 25 minutes for each attempt (unless you have accommodation for extended time)
- 2 attempts possible (but you don't have to do both if you're happy with your first score); keep the highest
- Must complete any attempts before Monday's class (10/4/21 at 3pm)
- Opens after class today (10/1/21 at 3:50pm)

The instructions you will see

Gentle Reminders

- Most important: **DON'T PANIC!**
- You are allowed to use any notes and materials you like.
- You are not allowed to collaborate with others - being caught doing so will result in a 0 for the exam.
- You will have **25 minutes from when you start** the timed assessment to complete it.
- Even though this timed assessment is out of 36 points, you'll get a 4 point headstart that will show up in the gradebook. This means this assessment is **effectively out of 32 points, even though there are more than 32 points possible**. So, if you earn 32 points of the 36 possible, you'll actually get $32+4 = 36$ out of $36 = 100\%$ on the assessment. (Therefore, it's **possible to earn more than 100% on this assessment**: if you score 36 on the exam, you'll actually get $36+4 = 40$ out of $36 = 111\%$.)
- You are allowed to take this timed assessment twice within the designated window, and keep the higher of the two scores.

GOOD LUCK!

Format and aids

Format: Multiple choice true/false “explanations” after a statement

Example format:

Four is an odd number.

(a) True: Three is also an odd number

(b) True: But five isn't an odd number.

(c) False: Four is an even number.

(d) False: Four isn't a number at all. However, three is a number.

Aids: You are allowed to use any notes, lecture slides, any references, homework answers, review questions, google (if you really want — it's probably not as useful), and anything else you can think of *except someone else's brain. No collaboration. No discussion with other people.*
