Psych 156A/ Ling 150:
Psychology of Language Learning

Lecture 13
Introduction to Language Structure

Announcements

HW3 due today

Please pick up previous assignments if you haven't done so already

Review questions for structure posted

Start thinking about the final assignment (see webpage for details on writing a paper instead of taking the exam)

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

Noun   Verb Noun
NP   NP

Depends on grammatical categories like Nouns and Verbs (and their associated phrases (NP)), but also on more precise distinctions like Subjects and Objects.

Some Noun Phrase distinctions:
  Subject = usually the agent/actor of the action, "doer": Jareth
  Object = usually the recipient of the action, "done to": crystals

---

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

Important idea: The observable word order speakers produce (like Subject Object Verb) is the result of a system of word order rules that speakers unconsciously use when they speak. This system of word order rules is called syntax.

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

One way to generate Subject Verb Object order:
The linguistic system specifies that order as the general pattern of the language. An example of this kind of system is English.

English   Subject Verb Object

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

Another way to generate Subject Verb Object order:
The linguistic system specifies Subject Object Verb as the general pattern, but the Verb in main clauses moves to the second position and some other phrase (like the Subject) moves to the first position. An example language like this is German.

German   Subject Object Verb

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

Another way to generate Subject Verb Object order:
The linguistic system specifies Subject Object Verb as the general pattern, but the Verb in main clauses moves to the second position and some other phrase (like the Subject) moves to the first position. An example language like this is German.

movement rules

German   _____ Verb Subject Object *Verb*

Computational Problem:
Figure out the order of words (syntax)

Jareth juggles crystals
Subject Verb Object

Another way to generate Subject Verb Object order:
The linguistic system specifies Subject Object Verb as the general pattern, but the Verb in main clauses moves to the second position and some other phrase (like the Subject) moves to the first position. An example language like this is German.

movement rules

German   Subject Verb *Subject* Object *Verb*

Computational Problem:
Figure out the order of words (syntax)

Jareth   juggles   crystals
Subject   Verb   Object

A third way to generate Subject Verb Object order:
The linguistic system specifies Subject Object Verb as the general pattern, but the Object moves after the Verb in certain contexts (the Object is unexpected information). Kannada is a language like this.
Kannada   Subject Object Verb

Computational Problem:
Figure out the order of words (syntax)

Jareth   juggles   crystals
Subject   Verb   Object

A third way to generate Subject Verb Object order:
The linguistic system specifies Subject Object Verb as the general pattern, but the Object moves after the Verb in certain contexts (the Object is unexpected information). Kannada is a language like this.

movement rule

Kannada   Subject *Object* Verb Object

Computational Problem:
Figure out the order of words (syntax)

Jareth   juggles   crystals
Subject   Verb   Object

German

English
Subject   Verb   Object   Subject Verb *Subject*   Object *Verb*

Kannada
Subject *Object* Verb Object

The learning problem: How do children know which system their language uses?

Computational Problem:
Figure out the order of words (syntax)

Jareth   juggles   crystals
Subject   Verb   Object

German

English
Subject   Verb   Object   Subject Verb *Subject*   Object *Verb*

Kannada
Subject *Object* Verb Object
This is a hard question!

Children only see the output of the system (the observable word order of Subject Verb Object).
Humans are good at language - how good are computers?

Translation is not so easy:
more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Japanese):

明かでない危険および番号なしあなたが遊んだ子供を取り戻す困難によって私によっては小悪魔都市を越える城に私の方法がここに戦った。

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child you have stolen.

Translation is not so easy:
more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Japanese):

明かでない危険および番号なしあなたが遊んだ子供を取り戻す困難によって私によっては小悪魔都市を越える城に私の方法がここに戦った。

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child you have stolen.

Translation (English):

My method fought here in the castle which exceeds the small demoniac city danger and the number which are not distinct it is not depending upon me with difficultly recovers the child whom you steal.

Original (Japanese):

明かでない危険および番号なしあなたが遊んだ子供を取り戻す困難によって私によっては小悪魔都市を越える城に私の方法がここに戦った。

Word-by-word translation to Japanese is poor. Japanese structure is very different from English structure at this level.

Translation is not so easy:
more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Russian):

Через untold и hardships опасностей незанумерованные, я воевал мою дорогу здесь к замоку за городом goblin принять назад ребенка, котор вы крали.

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child you have stolen.

Translation is not so easy: more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Russian):

Через untold и hardships опасностей незанумерованные, я воевал мою дорогу здесь к замку за городом goblin принять назад ребенка, котор вы крали.

Translation (English):

Through untold and hardships of dangers unnumbered, I warred my road here to [zamoku] after the city of goblin to accept back child, you was which they stole

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child you have stolen.

Original (Russian):

Через untold и hardships опасностей незанумерованные, я воевал мою дорогу здесь к замку за городом goblin принять назад ребенка, котор вы крали

Translation is not as poor. Russian structure is not as different from English structure at this level, though it is still different.

Translation is not so easy: more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Arabic):

من خلال لأمطار [لأنترلد] وشدات [لأنومبرد],قد تنازع أنا طريقي هنا إلى القصر إلى ما بعد لعفريتة مدينة أن يأخذ إلى الخلف الطفلة أنّ أنت قد سرقت

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child that you have stolen.

Translation is not so easy: more than just word-by-word

http://www.worldlingo.com/en/products_services/worldlingo_translator.html

Translation (Arabic):

من خلال لأمطار [لأنترلد] وشدات [لأنومبرد],قد تنازع أنا طريقي هنا إلى القصر إلى ما بعد لعفريتة مدينة أن يأخذ إلى الخلف الطفلة أنّ أنت قد سرقت

Translation (English):

Through dangers [['awntwld]] and pulls [['awnnwmbrd]], already I dispute roads here to the palace beyond the demon is city to the back takes to the child that you stole

Original (English):

Through dangers untold and hardships unnumbered, I have fought my way here to the castle beyond the goblin city to take back the child that you have stolen.

Original (Arabic):

من خلال لأمطار [لأنترلد] وشدات [لأنومبرد],قد تنازع أنا طريقي هنا إلى القصر إلى ما بعد لعفريتة مدينة أن يأخذ إلى الخلف الطفلة أنّ أنت قد سرقت

The translation is fairly poor. Arabic structure is fairly different from English structure at this level.

Solving the Language Problem (Artificial Intelligence)

HAL 9000 from 2001: A Space Odyssey (1968)

Perfect production and comprehension of English.
1960s: Language not considered one of the "hard" problems of artificial intelligence.

Reality in 2008: Still not close to human-like performance.

Contrast: Chess-playing. In 1997, a program named Deep Blue beat the reigning world champion in chess. It did this by having enough computational resources to investigate every move option before it actually made the chess move. This shows that computers' poor performance on language is not about insufficient computational power, since there is enough computational power to solve the chess-playing problem.

About Human Knowledge: Language & Variation
Navajo Code Talker Paradox (Baker 2001)

English must be very different from Navajo
  Japanese could decode English, but couldn't decode Navajo when they didn't know it was Navajo.

English must be similar to Navajo
  English can be translated into Navajo and back with no loss of meaning. (Languages are not just a product of the culture - pastoral Arizona lifestyle couldn't have prepared the codetalkers for Pacific Island high tech warfare. Yet, translation was still possible.)

Types of Variation

Vocabulary
English "think" verbs: think, know, wonder, suppose, assume, …

Multiple types of the action verb "think". Each has certain uses that are appropriate.

"I wonder whether the girl saved her little brother from the goblins." [grammatical]

* "I suppose whether the girl saved her little brother from the goblins." [ungrammatical]

Types of Variation

Vocabulary
English "think" verbs: think, know, wonder, suppose, assume, …
Navajo "carry" verbs: depends on object being carried
  aah (carry a solid round-ish object)

kaah (carry an open container with contents)

lé (carry a flexible object)

Types of Variation

Sounds: Each language uses a particular subset of the sounds in the International Phonetic Alphabet, which represents all the sounds used in all human languages. There's often overlap (ex: "m", "p" are used in many languages), but languages also may make use of the less common sounds.

less common English sounds: "th" [θ], "th" [ð]

less common Navajo sounds: "whispered l", "nasalized a", …

	Bilabial	Labiodental	Dental	Alveolar	Postalveolar	Retroflex	Palatal	Velar	Uvular	Pharyngeal	Glottal
Plosive	p b			t d		ʈ ɖ	c ɟ	k g	q ɢ		ʔ
Nasal	m	ɱ		n		ɳ	ɲ	ŋ	ɴ		
Trill	ʙ			r					ʀ		
Tap or Flap				ɾ		ɽ					
Fricative	ɸ β	f v	θ ð	s z	ʃ ʒ	ʂ ʐ	ç ʝ	x ɣ	χ ʁ	ħ ʕ	h ɦ
Lateral fricative				ɬ ɮ							
Approximant		ʋ		ɹ		ɻ	j	ɰ			
Lateral approximant				l		ɭ	ʎ	ʟ			

Types of Variation

Morphology (word forms)
   English: invariant word forms
        "the girl is crying", "I am crying"

   Navajo: no invariant forms (there may be 100-200 prefixes for verb stems)

   At'ééd yicha. "Girl crying"

   Yishcha. "I am crying"
   (yi + sh + cha)

   Ninááhwiishdlaad. "I am again plowing"
   (ni + náá + ho + hi + sh + l + dlaad)

Types of Variation

Word order (syntax)
   English: Subject Verb Object (invariant word order)
        "The boy saw the girl"

   Navajo: Subject Object Verb, Object Subject Verb
   (varying word orders, meaning depends only on verb's form)

   Ashkii at'ééd **yi**yiiltsá
   boy   girl   saw
   "The boy saw the girl"

   Ashkii at'ééd   **bi**iĺstá
   boy   girl   saw
   "The girl saw the boy"

Types of Variation

Word order (syntax)
   English: Subject Verb Object (invariant word order)
        "The boy saw the girl"

   Navajo: Subject Object Verb, Object Subject Verb
   (varying word orders, meaning depends only on verb's form)

   Ashkii at'ééd **yi**yiiltsá
   boy   girl   saw
   "The boy saw the girl"

   Ashkii at'ééd   **bi**iĺstá
   boy   girl   saw
   "The girl saw the boy"

This one prefix changes the entire meaning of the sentence
Thinking About Syntactic Variation
Similarities & Differences: Parameters

Chomsky: Different combinations of different basic elements (parameters) would yield the observable languages (similar to the way different combinations of different basic elements in chemistry yield many different-seeming substances).

Big Idea: A relatively small number of syntax parameters yields a large number of different languages' syntactic systems.

Similarities & Differences: Parameters

Chomsky: Different combinations of different basic elements (parameters) would yield the observable languages (similar to the way different combinations of different basic elements in chemistry yield many different-seeming substances).

Big Idea: A relatively small number of syntax parameters yields a large number of different languages' syntactic systems.

5 different parameters of variation

Similarities & Differences: Parameters

Chomsky: Different combinations of different basic elements (parameters) would yield the observable languages (similar to the way different combinations of different basic elements in chemistry yield many different-seeming substances).

Big Idea: A relatively small number of syntax parameters yields a large number of different languages' syntactic systems.

2 different parameter values of one parameter

Similarities & Differences: Parameters

Chomsky: Different combinations of different basic elements (parameters) would yield the observable languages (similar to the way different combinations of different basic elements in chemistry yield many different-seeming substances).

Big Idea: A relatively small number of syntax parameters yields a large number of different languages' syntactic systems.

Total languages that can be represented = $2^5 = 32$

Similarities & Differences: Parameters

Big Idea: A relatively small number of syntax parameters yields a large number of different languages' syntactic systems.
English

Japanese

Tagalog

French

Navajo

…
Learning Language Structure

Chomsky: Children are born knowing the parameters of variation. This is part of Universal Grammar. Input from the native linguistic environment determines what values these parameters should have.

Navajo

Generalizations About Language Structure

Greenberg's Word Order Generalizations

Navajo   Japanese

Greenberg's Word Order Generalizations

Navajo	Japanese
Basic word order: Subject Object Verb	Basic word order: Subject Object Verb

Ashkii aťééd yiyiiltsá
boy   girl   saw

"The boy saw the girl"

Jareth-ga Hoggle-o butta
Jareth   Hoggle   hit

"Jareth hit Hoggle"

Greenberg's Word Order Generalizations

Navajo	Japanese
Postpositions: Noun Phrase Postposition	Postpositions: Noun Phrase Postposition

'éé'   biih   náásdzá
clothing   into   I-got-back
"I got back into (my) clothes."

Jareth-ga Sarah   to   kuruma da
Jareth   Sarah with   car   by

London ni itta
London to went

"Jareth went to London with Sarah by car."

Greenberg's Word Order Generalizations

Navajo	Japanese
Possessor before Possessed	Possessor before Possessed
Possessor Possession	Possessor Possession

Chidí   bi-jáád
Car   its-leg

"the car's wheel"

Toby-no   imooto-ga
Toby's   sister

"Toby's sister"

Greenberg's Word Order Generalizations

Navajo	Japanese
Basic word order: Subject Object Verb	Basic word order: Subject Object Verb
Postpositions: Noun Phrase Postposition	Postpositions: Noun Phrase Postposition
Possessor before Possessed Possessor Possession	Possessor before Possessed Possessor Possession

Despite the differences in the languages (and their cultural histories), both Japanese and Navajo are very similar when viewed through these three structural descriptions.

Greenberg's Word Order Generalizations

English   Edo (Nigeria)

Greenberg's Word Order Generalizations

English   Edo (Nigeria)

Basic word order: Basic word order:
Subject Verb Object   Subject Verb Object

Sarah found Toby   Òzó mién Adésuwá
                           Ozo found Adesuwa

Greenberg's Word Order Generalizations

English   Edo (Nigeria)

Prepositions: Prepositions:
Preposition Noun Phrase   Preposition Noun Phrase

Jareth gave the crystal to   Òzó rhié néné ebé né Adésuwá
Sarah   *Ozo gave the book to Adesuwa*

Greenberg's Word Order Generalizations

English   Edo (Nigeria)

Possessed before Possessor   Possessed before Possessor

Possession Possessor   Possession Possessor

quest of Sarah   Omo Ozó
                                child Ozo
(alternative: Sarah's quest)
                                "child of Ozo"

Greenberg's Word Order Generalizations

English	Edo (Nigeria)
Basic word order: Subject Verb Object	Basic word order: Subject Verb Object
Prepositions: Preposition Noun Phrase	Prepositions: Preposition Noun Phrase
Possessed before Possessor Possession Possessor	Possessed before Possessor Possession Possessor

Again, despite the differences in the languages (and their cultural histories), both English and Edo are very similar when viewed through these three structural descriptions.

Greenberg's Word Order Generalizations

Greenberg found forty-five "universals" of languages - patterns overwhelmingly followed by languages with unshared history (Navajo & Japanese, English & Edo)

Not all combinations are possible - some patterns rarely appear
 Ex: Subject Verb Object language (English/Edo-like) + postpositions (Navajo/Japanese-like)

Moral: Languages may be more similar than they first appear "on the surface", especially if we consider their structural properties.

More Language Comparisons

French	Italian
Subject Verb Jareth arrivera *Jareth will-come*	Subject Verb Jareth verrá *Jareth will-come*
"Jareth will come."	"Jareth will come."
grammatical	grammatical

More Language Comparisons

French	Italian
*Verb Subject *Arrivera Jareth *Will-arrive Jareth*	Verb Subject Verrá Jareth *Will-arrive Jareth*
"Jareth will arrive"	"Jareth will arrive"
ungrammatical	grammatical

More Language Comparisons

French	Italian
*Verb	Verb
*Arrivera	Verrá
He-will-come	*He-will-come*
"He will come"	"He will come"
ungrammatical	grammatical

More Language Comparisons

French	Italian
Subject Verb	Subject Verb
*Verb Subject	Verb Subject
*Verb	Verb

These word order patterns might be fairly easy to notice. They involve the combinations of Subject and Verb that are grammatical in the language. A child might be able to notice the prevalence of some patterns and the absence of others.

More Language Comparisons

Expletive subjects: words without content
(may be more difficult to notice)

French	Italian
*Pleut	Piove.
It-rains.	It-rains.
"It's raining"	"It's raining."
Il pleut.	
It rains.	
"It's raining."	
	Okay to leave out expletive subject "it".
Not okay to leave out expletive subject "it".	

More Language Comparisons

Embedded Subject-Question Formation
(easy to miss)

French   Italian

Tu veux que Marie épouse Jay.
You want that Marie marries Jay.
"You want Marie to marry Jay."

*Qui veux-tu que ____ épouse Jay?
Que veux-tu qui ____ épouse Jay?
Who want-you that   marries Jay?
"Who do you want to marry Jay?"

Requires a special "that" form: qui.

More Language Comparisons

Embedded Subject-Question Formation
(easy to miss)

French   Italian

Credi che Jareth verrá.
You   think that Jareth will-come.
"You think that Jareth will come."

Che credi   che __   verrá?
Who think-you that   will-come?
"Who do you think will come?"

Does not require a special "that"
form: use the same one as
normally is used - *che*.

More Language Comparisons

French	Italian
Subject Verb	Subject Verb
*Verb Subject	Verb Subject
*Verb	Verb
Not okay to leave out expletive subject "it".	Okay to leave out expletive subject "it".
Requires special action for embedded subject questions.	Does not require special action for embedded subject questions.

All these involve the subject in some way - coincidence?
Idea: No! There's a language parameter involving the subject.

The Value of Parameters: Learning the Hard Stuff by Noticing the Easy Patterns

French vs. Italian: Subject Parameter

French   Italian   Easier to notice

Subject Verb   Subject Verb

*Verb Subject   Verb Subject   Hard to notice

*Verb   Verb

*Pleut   Expletives
It-rains.   Piove.
Il pleut.   It-rains.

Embedded Subject-question formation (easy to miss)

*Qui veux-tu   que ___ épouse Jean?   Che credi   che __   verrá?
Who want-you that   marries Jean?   *Who think-you that   will-come?*
Que veux-tu   qui ___ épouse Jean?

## The Value of Parameters: Learning the Hard Stuff by Noticing the Easy Patterns

French vs. Italian: Subject Parameter

Big idea: If all these structural patterns are generated from the same linguistic parameter (e.g. a "subject" parameter), then children can learn the hard-to-notice patterns (like the patterns of embedded subject questions) by being exposed to the easy-to-notice patterns (like the optional use of subjects with verbs). The hard-to-notice patterns are generated by one setting of the parameter, which children can learn from the easy-to-notice patterns.

Children's knowledge of language structure variation is believed by nativists to be part of Universal Grammar, which children are born with.

Universal Grammar: Principles & Parameters

Principles: Apply to all human languages.
   Ex: Language has hierarchical structure.
   Smaller units are chunked into larger units.

sounds	g a b l ɪ n
syllables	g a b l ɪ n
words	goblin
phrases	Noun Phrase (NP) Verb Phrase (VP) The sneaky goblin stole the baby
sentences	 S NP VP NP The sneaky goblin stole the baby

Universal Grammar: Principles & Parameters

Parameters: Constrained variation across languages. Children must learn which option their native language uses.

Japanese/Navajo

Basic word order:
Subject Object Verb
Postpositions:
Noun Phrase Postposition

Possessor before Possessed
Possessor Possession

S
NP VP
Subject   NP Verb
   Object
PP
NP P
Object postposition

Universal Grammar: Principles & Parameters

Parameters: Constrained variation across languages. Children must learn which option their native language uses.

Edo/English

Basic word order:
Subject Verb Object
Prepositions:
Preposition Noun Phrase

Possessed before Possessor
Possession Possessor

S
NP VP
Subject Verb NP
    Object

PP
P NP
preposition Object

Universal Grammar: Principles & Parameters

At this level of structural analysis (parameters), languages differ vary minimally from each other. This makes language structure much easier for children to learn. All they need to do is set the right parameters for their language, based on the data that are easy to observe.

Japanese/Navajo

S
NP VP
Subject NP Verb
  Object

PP
NP P
Object postposition

Edo/English

S
NP VP
Subject Verb NP
    Object

PP
P NP
preposition Object

Language Variation: Summary

While languages may differ on many levels, they have many similarities at the level of language structure (syntax). Even languages with no shared history seem to share similar structural patterns.

One way for children to learn the complex structures of their language is to have them already be aware of the ways in which human languages can vary. Nativists believe this is knowledge contained in Universal Grammar. Then, children listen to their native language data to decide which patterns their native language follows.

Languages can be thought to vary structurally on a number of linguistic parameters. One purpose of parameters is to explain how children learn some hard-to-notice structural properties.

Questions?
